Email: salescpt@landbcapetown.co.za

L & B Industrial Power is a pump company, specialising in selling, distributing, repairing and installation of pumps. We are represented country-wide through the distribution network allocated through the whole of South Africa. We have a very reputable track record in supporting the pump, motor and valve industry with good products, outstanding service and excellent after sales service. For your convenience we offer a 24 Hour breakdown service. Members of South African Oil and Gas Alliance and we are part of South African Quality Institute.

Direct Importers of **VIKING** and **BLAGDON** pumps
Distributors of **EBARA**, **VERSAMATIC**, **SANDPIPER**,
ZILMET, **HORMA**, **VERDER**, **THEBE**, **ORBIT**, **PIONEER**
PUMPS AND ROTOFLOW.

L&B INDUSTRIAL POWER SERVICES

- **Service and repairs to all pump brands and Fire pump Equipment**
- **Rewinding on all motors 24 Hour**
- **24 Hour Breakdown service**
- **Replacement and repair of all mechanical seals**
- **Valves and Bearing replacements**
- **Pump Installations**

BEFORE

AFTER

We have the pump for your industry

VIKING PUMP

Viking Pump a Unit of IDEX Corporation, leads the world in the designing and manufacturing of rotary Positive Displacement Pumps for use in some of the toughest applications since 1911.

MARKETS AND APPLICATIONS

CHEMICALS:

- Acids & Bases
- Alcohols & Solvents
- Soaps & Detergents

POLYMERS

- Rubbers & Plastics
- Fibres & Resins
- Polyurethanes

OILS

- Crude Oils
- Lube Oil & Greases
- Asphalt & Bitumen's

FUELS:

- Refined Fuels
- Biofuels
- Liquefied Gases

MACHINERY:

- Fuel & Lube
- Heat Transfer Liquids
- Filtration

FOODS:

- Liquid Sugars
- Chocolate & Confectionery
- Edible Oils

PERSONAL CARE:

- Lotions & Creams
- Toothpaste
- Hair & Skin Care

PULP & PAPER:

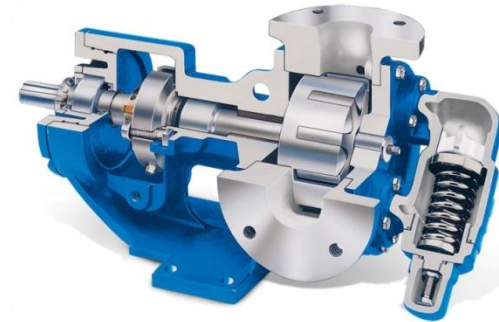

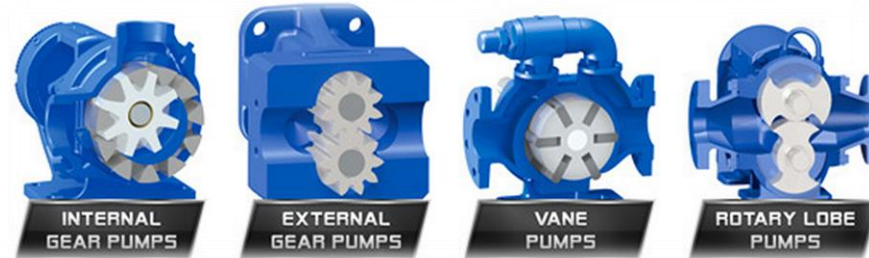

- Coatings
- Starch
- Black Liquor Soap

WATER & WASTEWATER:

- Methanol
- Polymers
- Additives

COATINGS & SEALANTS:

- Paints, Dyes & Inks
- Adhesives
- Caulks

Ebara pumps Europe produces stainless steel and cast iron pumps for the domestic, utility and industrial markets around the world. The modern, efficient design and manufacturing technology allows them to produce competitive products whilst being energy efficient. Certain products interchange with other manufactures such as Lowara, Grundfos, Dab, KSB, Calmed and others.

EBARA INDUSTRIES

- **Industrial**
- **Mining-Dredging-Slurry**
- **Wastewater**
- **Agriculture & Irrigation**
- **Self-priming swimming pool**
- **Self-priming**
- **Surface**
- **Slurry pumps**
- **Threaded circulator**
- **Building service**
- **Mining pumps**
- **Brewing**
- **Commercial**
- **Pressurisation**
- **Industrial booster sets**
- **Lift stations**
- **Vertical multistage**
- **Submersible**

WE ARE EBARA. PROVEN AND TRUSTED.

Zilmet has a wide range of pumps and product that is suitable for everybody.

What you can find in the Zilmet Range:

- **Submersible Pumps in Cast Iron & Stainless Steel**
- **Centrifugal Pumps**
- **Self Priming Pumps**
- **Horizontal Multistage Pumps**
- **Jet Pumps**
- **Pressure Tanks**
- **Pressure controller**
- **SOLAR Borehole & Electric Borehole**

Industries where you can use the Zilmet Range:

- **Domestic &**
- **Industrial**

For the past 18 years Vega Pumps has served in the pump industry with a vast product variety that caters for the Mining, Industrial, Agriculture and Utility markets.

Products you can find in this Range:

- **Agitator Submersible pump**
- **Twin Stage End-Suction**
- **Solar Boreholes Kits**
- **Slurry Submersible**
- **High Flow Pumps**
- **Control Boxes**
- **Solar Inverters**
- **Multistage Pumps**

- **Closed Coupled Pumps**
- **Digital Starter**
- **Fountain Pumps**
- **Booster Pumps**
- **Hot Water Circulator Pumps**
- **Self Priming Pumps**
- **Peripheral Vane Pumps**
- **Sewage Pumps**
- **Ect**

**The LBR range is complete turn key solution that can supply you
With pumps, motors, gearboxes and everything related to the
Pump industry.**

Industries where you will the LBR Range:

- **Industrial**
- **Mining-Dredging-Slurry**
- **Wastewater**
- **Agriculture & Irrigation**
- **Self-priming swimming pool**
- **Self-priming**
- **Surface**
- **Slurry pumps**
- **Threaded circulator**
- **Building service**
- **Mining pumps**
- **Brewing**
- **Commercial**
- **Pressurisation**
- **Industrial booster sets**
- **Lift stations**
- **Vertical multistage**
- **Submersible**

We as a Company offers engine driven, self-priming, jet, deep-well, single stage, multi stage, submersible, and tractor driven pumps. Thebe Bombas Hidraulicas markets its products throughout Brazil.

Application where you will be using a Thebe:

- **Water Treatment**
- **Residential Supply**
- **Fire Fighting**
- **Sanitation**
- **Washing System**
- **Reverse osmosis system**
- **Pressurizing system**
- **Cooling system**
- **Driven Well, Low pressure grids**
- **Waste Water**
- **Sewer**
- **Fertigation**
- **Industria**
- **Water tank cleaning**
- **Green House Fogging**
- **Semi-artesian & artesian wells**
- **Public water supply**
- **Farming**
- **Air conditioning**
- **Boilers**
- **Slurry**
- **Construction**
- **Chemicals**

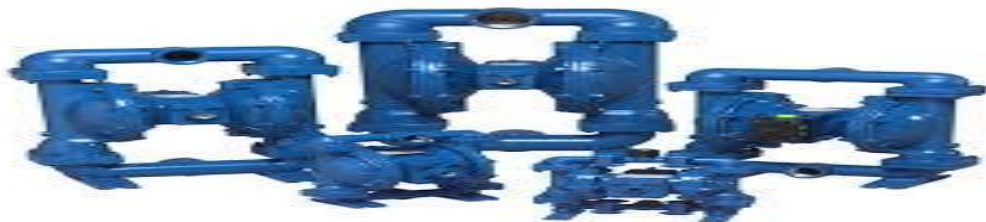

Blagdon offers an extensive range of pumps from handling fluid media safely and cost effectively. Our experienced staff can provide instant support and installation, servicing, maintenance and technical enquiries. We offer a speedy, efficient spares delivery service

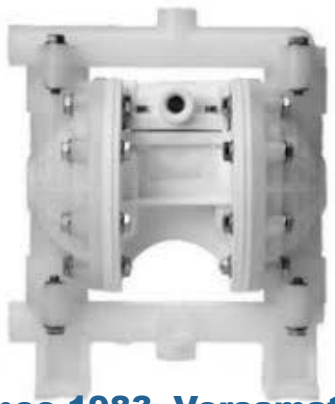

KEY FEATURES AND BENEFITS

- They are self-priming to over 6 metres.
- They are pressure balanced
- They have minimum product agitation.
- They have a long stroke, slow speed cycling capability for low initial break out.
- They are safe in hazardous areas, no sparking, air-driven.
- Can run dry without damage or danger.
- They are fully submersible.
- Designed to operate at low noise levels.
- Leak-free air valves that are easily removed for servicing.
- They can be easily maintained.
- Can be stripped down quickly without the need for specialised tools.
- They are portable and compact and can be remotely controlled and fully packaged.

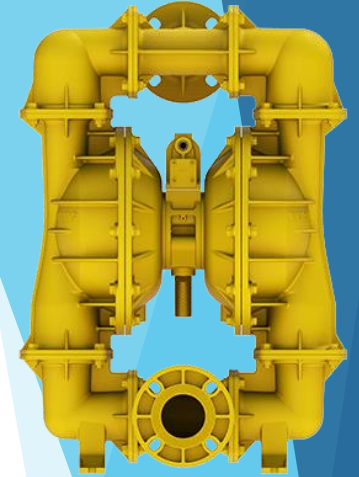

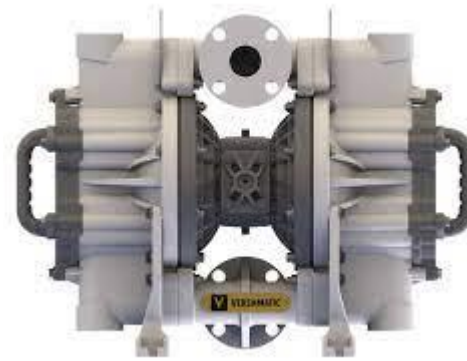

KEY AREAS OF APPLICATION

- **Ceramics**
- **Chemical & Petrochemical**
- **Coatings**
- **Food & Beverage**
- **Wastewater**

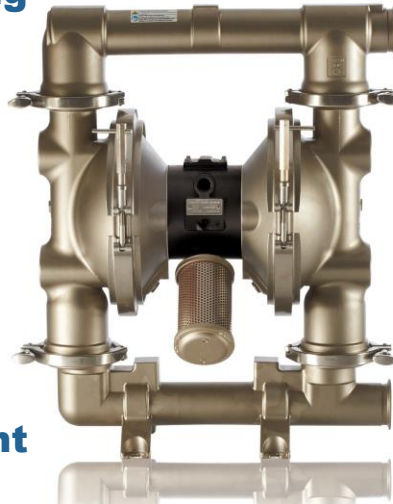

VERSAMATIC®
PUMPING MADE EASY

Since 1983, Versamatic has set the standard of performance for air-operated double-diaphragm AODD pumps. The Versamatic double-diaphragm pump is the first choice for customers who value reliability, customer service, application engineering and after-sales support teams.

Versamatic Key Industries:

- General Manufacturing
- Chemical
- Oil & Gas
- Paints & Coating
- Mining
- Food & Beverage
- Marine
- Ceramics
- Construction
- Pharmaceutical
- Wastewater Treatment

PTFE

HYTREL

SANTOPRENE

NBR

EPDM

Supported Materials for Construction of Pump:

- Non-Metallic
- Metallic

Supported Materials for Diaphragms and Inserts of Pump:

- PTFE
- Hytrel
- Santoprene
- NBR
- EPDM

Types of Versamatic AODD Pumps:

- Flap Valve
- Ball Valve
- Bolted
- Bolted Atex
- Clamped

With over 55 years of trusted solutions expertise, SANDPIPER delivers best-in-class pumping and engineering innovations for most difficult and demanding pumping challenges.

Sandpiper Key Industries:

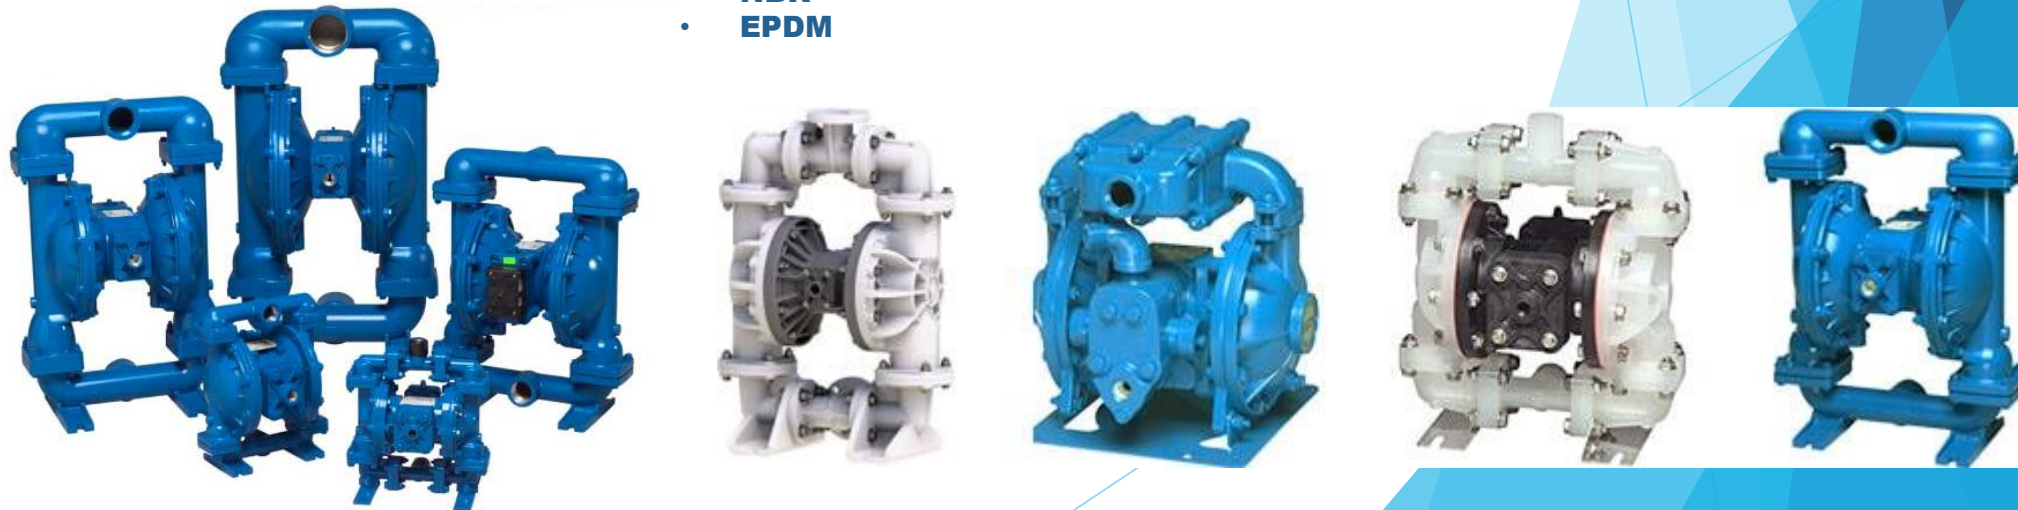

- **Aerospace**
- **Automotive**
- **Building Products & Construction**
- **Ceramics**
- **Chemical**
- **Coatings**
- **Electronics/Semiconductor**
- **Marine/Rail/Ground Transport**
- **Mining**
- **Oil & Gas**
- **Packing**
- **Pulp & Paper**
- **Steel & Metal**
- **Sanitary**

Supported Materials for Construction of Pump:

- **Non-Metallic**
- **Metallic**

Supported Materials for Diaphragms and Inserts of Pump:

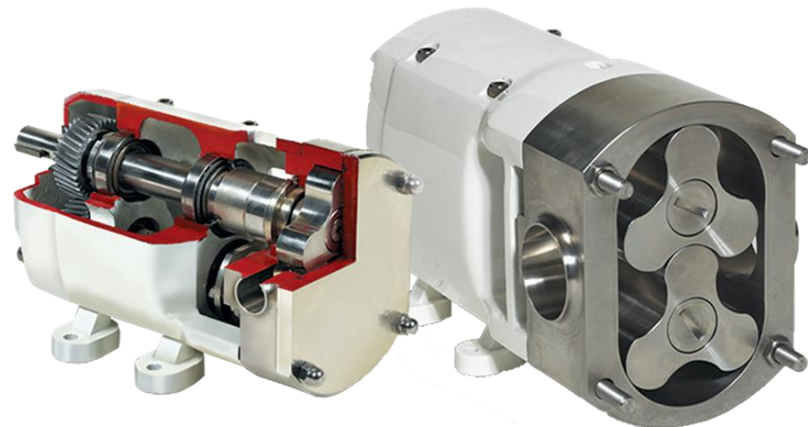

- **PTFE**
- **Hytrel**
- **Santoprene**
- **NBR**
- **EPDM**

Rotary lobe pumps The Rotorflo rotary lobe pump is designed specifically for the food, beverage, pharmaceutical and other hygiene-conscious process industries.

- The Rotorflo is a high-performance, compact pump which requires little maintenance.
- The compact Rotorflo series of pumps is designed and manufactured to international standards, with all wetted parts in 316 stainless steel.
- The Rotorflo is available in nine basic models in various combinations to cope with a wide range of flow rates and pressures. Pumps in the range have a maximum flow rate of 96m³/hr and pressures of up to 15 bar. With various combinations of pump heads, rotor configurations and seals, a wide range of media can be handled without product degradation.

Applications

- Food
- Pharmaceutical
- Dairy
- Hygiene-sensitive applications
- For pumping shear-sensitive or viscous fluids

ORBIT RANGE:

- **GW RANGE** - Orbit GW range of pumps offers reliable performance over a broad range of heads and speeds. The abrasion-resistant pump also features low noise and vibration levels.
- **HOP RANGE** - Orbit hand pumps are easy to use and are ideal for rural water supply. The rugged, reliable, long-life design delivers a pump that is suitable for use in remote villages and similar environments.
- **POWER PUMP RANGE** - Orbit range of helical rotor, horizontal power pumps for high flow and high head water transfer duties and similar applications are highly efficient over a broad range of heads and speeds for reduced fuel and/or electricity consumption.
- **MINI RANGE** - industrial helical rotor pumps offer excellent suction capabilities across a broad range of applications, from water and wastewater to mining and chemicals.
- **INDUSTRIAL E RANGE** - industrial helical rotor pumps offer excellent suction capabilities across a broad range of applications, from water and wastewater to mining and chemicals.
- **INDUSTRIAL B & D** - industrial helical rotor pumps offer excellent suction capabilities across a broad range of applications, from water and wastewater to mining and chemicals.

APPLICATION:

- Agriculture
- Brewing & beverages
- Building & construction
- Ceramics
- Chemicals
- Mining
- Paper & pulp
- Pharmaceuticals & cosmetics
- Water & wastewater industry
- Residential
- Commercial
- Marine
- Municipal
- Industrial
- River water extraction
- DWAF
- Stock watering
- Rural drinking water supply
- Filling of overhead tanks
- Water abstraction where no alternative power source is available
- Spray irrigation
- Domestic water supply
- Water extraction from saturated river beds
- High capacity flow water transfer

Wet Prime Pumps

Pioneer self-priming pumps are designed for reliable solid and clear liquid handling. After initial priming, they continue to re-prime – for low maintenance and cost-effective performance.

- Rely on the best materials — Standard heavy-wall ductile iron volute and 17-4 PH stainless steel shaft for durability and peace of mind.
- Get peak performance — A simple external shimless impeller adjustment means the user can easily adjust the tolerance between the impeller and wear plate.
- Trust our seals — Cartridge type tungsten vs. silicon carbide mechanical seal makes for ease of maintenance and simple installation.

Wet Prime Centrifugal Pump

Ideal for the toughest tasks -- all within a standard footprint -- the Pioneer Pump® GT Series is a heavy-duty self-priming sewage pump solution for nearly any food processing, wastewater treatment, waste handling, chemical processing, or industrial application with high performance demands. The GT Series features a larger shaft design, heavy-duty bearing frame and ductile iron construction which increases durability and allows operating at higher speeds than the industry standard for self-priming pumps. Our unique suction design improves NPSHr and alleviates abrasion wear on the pump. The distinct cover combines both the fill access port and flapper check valve into one to improve ease of use.

Wet Prime

Ideal for lift stations, municipal sewer or industrial wastewater needs, the Pioneer Pump® GS Series is a cost-effective solution for high head applications with high performance demands. These robust self-priming sewage pumps are available in 3, 4, 6, 8, and 10-inch sizes, with maximum flow rates up to 3,450 gpm, and maximum head of 175 feet, and solids handling capabilities of up to 3 inches. Offered assembled as part of a full pumping package or as a standalone pump, the GS Series provides industry consistency in rotating assembly interchangeability and pump footprint when compared to other manufacturer models

SULZER

A wide range of pumping and mixing systems and services ,since 1834 Sulzer has been a key player in providing pumping and mixing solutions. Its diversified product and service portfolio answers virtually any requirements. With active research and development to support a customer-oriented approach, Sulzer has sales and service facilities all over the world to provide flexible response and support.

THE RIGHT PRODUCT:

Thanks to its extensive portfolio, Sulzer is able to offer the product to meet even the most stringent needs. With dedicated research and development effort, Sulzer can customize virtually any products to make it the optimum solution.

THE RIGHT SERVICES:

Sulzer's expertise and commitment always deliver reliability, responsiveness, rapid turn-around and innovative solutions. With a network of over 150 production and service sites, Sulzer supports customers locally, around the clock, 365 days a year.

THE RIGHT PARTNER:

From development to implementation and monitoring, Sulzer is a single-supplier giving operations an edge. Over the years, customers have successfully turned to Sulzer, making it the world leader in many industries.

SULZER INDUSTRIES

- Chemical processing
- Healthcare
- Oil and Gas
- Power Generation
- Pulp and Water
- Water

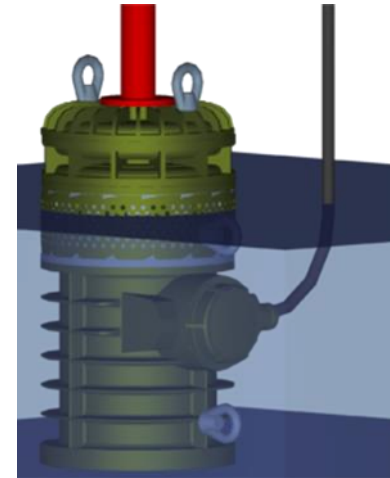

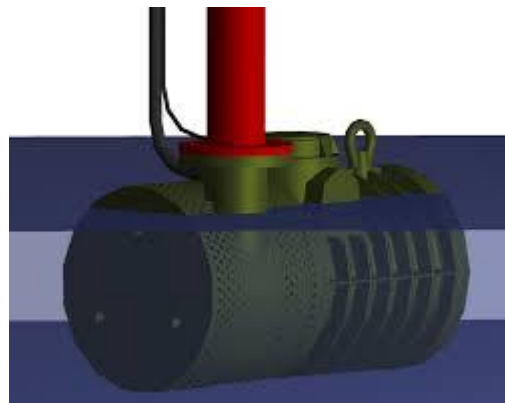

JENNY SUBMERSIBLE

Jenny GDL series of pumps are vertical submersible pumps, designed for dewatering applications of dirty and clean water. These pumps range is from 4kw to 90kw, the 90 KW can either be used in a vertical or horizontal configuration. The Jenny GDL series have been designed for typical drainage applications where small particles may be present.

JENNY FIELDS OF APPLICATION

- **Mining applications**
- **Industrial waste water**
- **Agriculture irrigation**
- **Construction site drainage or even water features**

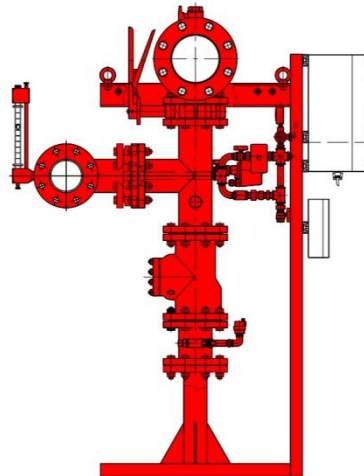

We have the pump for your industry

BOOSTER & FIRE-FIGHTING PUMP SETS

- Ready to fit (Plug & Play)
 - Maintenance
- Independent replacement units
- Customer specific design

PUMP PANEL SYSTEM

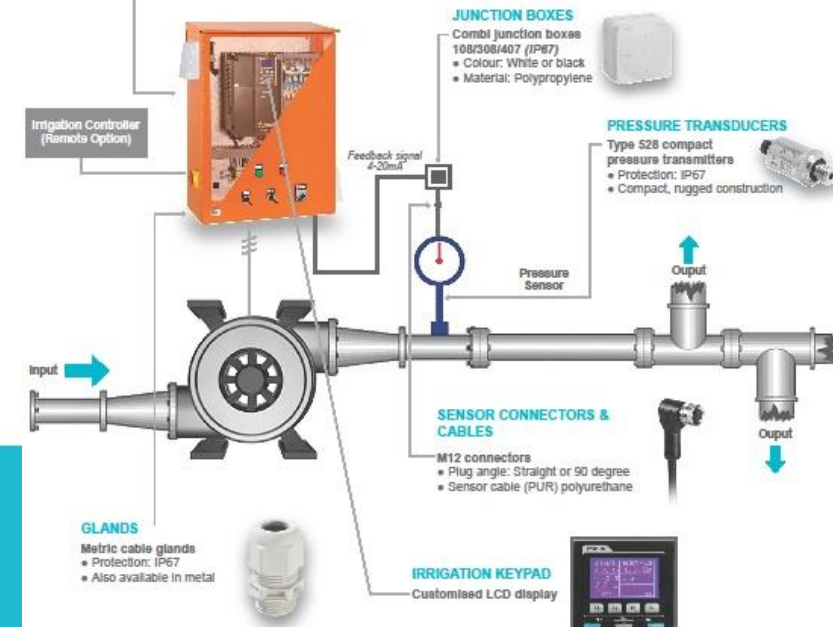

- Irrigation and Solar system
- Installation of Panels

IRRIGATION PUMP PANELS

Standard Features:

- Panel mount isolator
- Drive and control circuit breakers
- Class II surge protection
- Power and control terminals
- Manual off/auto selector switch
- Run and trip indication
- Cooling fans and vents
- Rotary setpoint selector (more than one setpoint)

Typical applications include:

- Irrigation of land
- Domestic water supply
- Fish farming
- Water for livestock
- Solar powered fountains
- Sprinklers, misters and soakers
- Ground dewatering for excavation
- Construction sites
